

Design Worksheet : **Design a walkSTEM® Stop**

Use for each walkSTEM stop that makes up your walkSTEM® experience. If you are planning a theme-based walkSTEM tour, under #2 below, make sure to address how each stop will help participants gain valuable experience that relates to your selected theme.

Object and Location:

1. **Notice** — What do you observe?

2. **Questions** — What do you wonder based on what you observed?

3. **Curate** — If this were a stop on a walkSTEM tour, which question from #2 above would you focus on? Rephrase, if needed.

4. **Design** — What will your tour participants do while at this stop? Would you like to include some simple “props” to help make connections or provide examples (such as photos or models)? In other words, how will they answer your question in #3.
